Forecast For East of England
Issued by Met Office Exeter
at 0400 on Sunday 12 Dec 2021

++ Valid for broadcast between 0600 and 1800

Headline:
Cloudy, damp start Sunday but becoming drier and brighter. Mild.

Today:
Overcast at first with some residual outbreaks of rain and drizzle. Soon becoming generally dry, with afternoon bright or sunny spells developing. Feeling noticeably milder than recent days but becoming breezier later. Maximum temperature 13 deg C (55 deg F).

Tonight:
Generally rather cloudy overnight, although most places should remain dry. However, thicker cloud and some outbreaks of rain may reach the far west later. Breezy at times. Minimum temperature 10 deg C (50 deg F).

Monday:
Generally cloudy. Most places should be dry, although outbreaks of rain likely in the far west, and these will move east across the region through the evening. Mild. Maximum temperature 12 deg C (54 deg F).

Outlook for Tuesday to Thursday:
Cloudy, damp start Tuesday, becoming drier and brighter. Wednesday and Thursday, variable cloud amounts but generally dry, some overnight mist or fog possible where cloud breaks. Still mild.
